

SESSION_03

Q.1 Declare variables for a Flipkart product: productName (as a string), price (float), and rating (double). Assign sample values and print each variable with its data type.

```
A.1  #include <stdio.h>

      int main() {
          char productName[] = "Wireless Headphones";
          float price = 1499.50;
          double rating = 4.6;

          printf("Product Name: %s\n", productName);
          printf("Price: %.2f (float)\n", price);
          printf("Rating: %.1f (double)\n", rating);
          return 0;
      }
```

Q.2 Create a constant variable to store the GST rate (for example, 18%) and use it to calculate the final price of a Zomato order with a given base price. Constraint: The GST rate must not be changeable after its initial assignment.

```
A.2  #include <stdio.h>

      int main() {
          const float GST_RATE = 18.0;
          float basePrice = 500.0;
          float gstAmount = basePrice * GST_RATE / 100;
          float finalPrice = basePrice + gstAmount;

          printf("Base Price: %.2f\n", basePrice);
          printf("GST Rate: %.2f%%\n", GST_RATE);
          printf("GST Amount: %.2f\n", gstAmount);
          printf("Final Price: %.2f\n", finalPrice);
          return 0;
      }
```

SESSION_03

Q.3 Write a program that stores your favorite Spotify playlist's name (string), total number of songs (int), and average song duration in minutes (float). Print all values in a single formatted sentence.

A.3 #include <stdio.h>

```
int main() {  
    char playlistName[] = "My Chill Playlist";  
    int totalSongs = 55;  
    float averageDuration = 4.5;
```

```
    printf("My playlist '%s' has %d songs with an average duration of %.1f minutes.", playlistName,  
totalSongs, averageDuration);  
    return 0;  
}
```

Q.4 Identify and correct the invalid variable names from this list: 1stPlayer, player_age, \$score, total-marks, userName. Apply standard variable naming rules for your programming language.

A.4

Given name	Valid
1stPlayer	No
player_age	Yes
\$score	No
total-marks	No
userName	Yes
